

Tourism Agency Website - Editing Documentation

Complete Guide

Table of Contents

1. Editing Languages & Translations
2. Adding & Editing Bikes
3. Editing Contact Information
4. Editing Social Media Links
5. Editing Redirect Links for Infocard Buttons

1. Editing Languages & Translations

File to Edit:

translationvalues.js

This file contains all the text that appears on your website in both English and Spanish. Here's how to add or edit translations:

Steps to Edit Translations:

1. Open the file **translationvalues.js** in a text editor
2. Find the section for the text you want to edit (examples below)
3. Change the English version in the 'en:' section
4. Change the Spanish version in the 'es:' section
5. Save the file

Example - Changing the Introduction Text:

Current code:

```
intro: "Vamos Agency",
```

To change it, replace the text between the quotes. For English and Spanish versions:

```
en: { intro: "Your New English Text", ... }, es: { intro: "Tu nuevo texto en español", ... }
```

Available Sections to Edit:

- Topbar (header): topbar
- Introduction: intro
- Bike fleet section: fleet, all, mountain, road, electric, city
- Info cards: language, land, waterTours, bike, accomodations
- Booking form labels: fname, lname, Email, biketype, Quantity, Date, Bookbutton
- Footer: information, contact, address, phone, imprint, legal

2. Adding & Editing Bikes

File to Edit:

bikes.js

This file contains all the bikes available for rent. Each bike has a name (in English and Spanish), a type, and an image.

Bike Types Available:

- mountain - Mountain bikes
- road - Road bikes
- electric - Electric bikes
- city - City bikes

How to Add a New Bike:

1. Open the file **bikes.js** in a text editor
2. Find the end of the bike list (before the closing bracket ']')
3. Add a comma after the last bike entry
4. Copy and paste the template below
5. Fill in your bike details
6. Save the file

Bike Entry Template:

```
{  name: {    en: "Your Bike Name",    es: "Nombre de tu bicicleta"  },  type: "bike_type",  image: "images/imagefile.jpg" },
```

Example - Adding a Fat Bike:

```
{  name: {    en: "Fat Tracker",    es: "Rastreador Grueso"  },  type: "mountain",  image: "images/fatbike.jpg" }
```

Important Notes:

- Make sure your image file exists in the images folder
- Always include both English and Spanish names
- Use one of the four bike types: mountain, road, electric, or city
- Don't forget the comma after each entry (except the last one)

3. Editing Contact Information

File to Edit:

index.html

Your contact information is displayed in the footer at the bottom of the page. Here's how to update it:

Finding the Contact Information Section:

1. Open **index.html** in a text editor

2. Scroll to the bottom of the file (look for the <footer> tag)
3. Find the section with 'address:' and 'phone:'

How to Update Address:

Current code:

```
<p id = "address">    <span style="color: aqua;">address: </span>    <br>    address    <br>    address    <br>    address </p>
```

Replace each 'address' line with your actual address. Example:

```
<span style="color: aqua;">address: </span> <br> Vamos Agency <br> 123 Beach Street <br> Malaga, Spain  
29001 <br> Europe
```

How to Update Phone Number:

Current code:

```
<p id = "phone"> <span style="color: aqua;">phone:</span>phone</p>
```

Replace 'phone' with your actual phone number. Example:

```
<p id = "phone"> <span style="color: aqua;">phone:</span>+34 951 234 567</p>
```

4. Editing Social Media Links

File to Edit:

index.html

The social media links are at the top of the page (in the topbar). Here's how to update them:

Finding Social Media Section:

1. Open **index.html** in a text editor
2. Look for the <div class="topbar-right"> section near the top of the file
3. Find the links for Facebook, Twitter, and Instagram

Social Media Links Code:

```
<a href="https://www.facebook.com/VamosAcademySpain/" title="Facebook">Facebook</a> <a  
href="https://twitter.com/VamosAcademy" title="Twitter">Twitter</a> <a  
href="https://www.instagram.com/vamospanishmalaga/" title="Instagram">Instagram</a>
```

How to Update Social Media Links:

1. Copy your social media profile URL
2. Replace the URL in the href="..." part
3. Keep the link text (Facebook, Twitter, Instagram) the same

Example - Updating Facebook Link:

Replace: href="https://www.facebook.com/VamosAcademySpain/"

With: href="https://www.facebook.com/YOUR_PAGE_NAME/"

Quick Reference for Social Media URLs:

Facebook: https://www.facebook.com/YOUR_PAGE_NAME/

Twitter: https://twitter.com/YOUR_HANDLE

Instagram: https://www.instagram.com/YOUR_HANDLE/

5. Editing Redirect Links for Infocard Buttons

File to Edit:

infocards_links.js

When users click on the different service cards (Language, Land Tours, Water Tours, etc.), they are redirected to different pages or websites. This file controls where those clicks go.

Available Buttons to Edit:

- Case 1: Language Experience
- Case 2: Land Tours
- Case 3: Water Tours
- Case 4: Bike Tours
- Case 5: Events
- Case 6: Accommodations

How to Update Redirect Links:

1. Open **infocards_links.js** in a text editor
2. Find the case number for the link you want to edit (see list above)
3. Replace the URL in the `window.open("YOUR_URL_HERE");` line
4. Save the file

Example Code Format:

```
case 1://Language    window.open("https://google.com"); break;
```

Example - Changing the Language Experience Link:

Current:

```
window.open("https://google.com");
```

New (example):

```
window.open("https://www.yourlanguageschool.com");
```

Important: Leave Links Empty if Not Ready

If you don't have a page ready yet, you can leave it empty:

```
window.open("");
```

General Tips & Best Practices

- ✓ Always save your files after making changes
- ✓ Be careful with punctuation - keep commas and semicolons in the right place

- ✓ Don't delete quotes (" ") or curly braces { }
- ✓ When copying and pasting code, make sure you don't add extra spaces
- ✓ Test your changes in a web browser to make sure everything looks correct
- ✓ Keep backup copies of files before making major changes
- ✓ Image filenames are case-sensitive on some servers - be consistent

Troubleshooting

Problem: Changes don't appear on the website

Solution: Clear your browser cache or do a hard refresh (Ctrl+Shift+R on Windows, Cmd+Shift+R on Mac)

Problem: Website shows an error after editing

Solution: Check for missing commas, semicolons, or quotes in your edits. Undo the last change and try again.

Problem: Images don't show up

Solution: Make sure the image path is correct and the file exists in the images folder.

Problem: Links don't work

Solution: Make sure the URL starts with http:// or https:// and is correct.

Quick File Reference

translationvalues.js - Edit text & language translations

bikes.js - Add or edit bikes in the fleet

index.html - Edit contact info, social media links, and general page content

infocards_links.js - Edit where the service buttons redirect to

For more detailed help, contact your web developer or administrator.

Editing Files Directly on GitHub

Your website files are stored on GitHub, which is a code hosting platform. You can edit files directly through GitHub's website without needing special software.

Step 1: Access Your GitHub Repository

1. Go to [GitHub.com](https://github.com)
2. Log in to your account (or ask your administrator for the login)
3. Find your repository (it's like a folder that contains all your website files)
4. Look for the file you want to edit in the list

Step 2: Edit a File on GitHub

1. Click on the file you want to edit (for example, translationvalues.js)
2. Look for a pencil icon (✎) in the top right corner of the file
3. Click the pencil icon to enter edit mode
4. Make your changes directly in the text editor

5. When finished, scroll down to find the 'Commit changes' button

Step 3: Save Your Changes (Commit)

When you 'commit' on GitHub, you're saving and uploading your changes.

1. After editing, scroll to the bottom of the page
2. In the 'Commit changes' section, add a short description (e.g., 'Updated phone number' or 'Added new bike')
3. Click the green 'Commit changes' button
4. Your changes are now live on the website!

GitHub Edit Example:

Editing translationvalues.js on GitHub:

1. Go to your repository and find translationvalues.js
2. Click on it to view the file
3. Click the pencil icon (✎) to edit
4. Find the text you want to change (e.g., intro: "Vamos Agency")
5. Replace it with your new text
6. Scroll down and click 'Commit changes'
7. Add a message like 'Updated intro text'
8. Click the green button and you're done!

Important: Website Update Delay

After you commit changes to GitHub, it may take 1-5 minutes for the changes to appear on your live website. If you don't see the changes:

- Wait a few minutes and refresh the page
- Do a hard refresh: Press Ctrl+Shift+R (Windows) or Cmd+Shift+R (Mac)
- Clear your browser cache

Advantages of Using GitHub to Edit:

- ✓ No special software needed - edit from any browser
- ✓ Changes go live automatically
- ✓ GitHub keeps a history of all changes
- ✓ Multiple people can work on files (with proper permissions)

Understanding Formspree - The Booking Form

Your website has a booking form that allows customers to request bike rentals. This form is powered by Formspree, a free service that collects form submissions.

How the Booking Form Works:

1. A customer fills out the booking form on your website:
 - First Name
 - Last Name
 - Email
 - Bike Type
 - Quantity (number of bikes)
 - Date
2. They click 'Book Now'

3. Formspree receives the submission and sends it to your email
4. You receive an email with the booking details

Finding the Formspree Code in Your Website:

The form is set up in the index.html file. If you open it, look for this line:

```
<form action="https://formspree.io/f/xrenkkyw" method="POST">
```

The code 'xrenkkyw' is your unique form ID that tells Formspree where to send the submissions.

Setting Up Formspree (First Time Only):

If you haven't already set up Formspree:

1. Go to formspree.io
2. Click 'Sign Up' and create a free account
3. Enter your email address
4. Verify your email by clicking the link Formspree sends you
5. Create a new form project for your website
6. Formspree will give you a unique form ID (like xrenkkyw)
7. Copy this ID and replace it in the index.html file

Viewing Your Form Submissions:

Method 1: Email Notifications

- Every time someone books a bike, you automatically receive an email with their details

Method 2: Formspree Dashboard

1. Log in to formspree.io with your account
2. Find your form project
3. You can see all submissions in one place
4. Export submissions as a spreadsheet if needed

What If Submissions Aren't Working?

Problem: Form submissions not received

Solutions:

1. Check that your Formspree email is verified (check your email inbox)
2. Check your spam/junk folder for Formspree emails
3. Make sure the form ID in index.html matches your Formspree account
4. Visit the Formspree dashboard to see if submissions are being received

Changing Your Formspree Email:

If you want to receive booking notifications at a different email:

1. Log in to formspree.io
2. Find your form settings
3. Update the email address
4. Verify the new email address

Customizing Form Messages:

You can customize what message users see after they submit the form:

1. Log in to formspree.io

2. Go to your form settings
3. Set the 'Thank you' message and redirect URL
4. Users will see your custom message after booking

Adding New Form Fields:

If you want to add new fields to the booking form (like phone number, hotel name, etc.):

1. Edit index.html
2. Add a new label and input field before the Book Now button:
`<label id="phone">Phone Number</label><br> <input type="tel" name="phone" required><br>`
3. Save the file
4. The new field will automatically be included in form submissions

Free Plan Limitations:

Formspree has a free plan that's perfect for small websites. Here's what you get:

- ✓ Unlimited forms
- ✓ Unlimited submissions
- ✓ Email notifications
- ✓ Access to submissions history

If you need more advanced features (like file uploads or advanced integrations), you can upgrade to a paid plan.

Formspree Workflow Diagram:

Customer fills form → Clicks 'Book Now' → Formspree receives data → Email sent to you → You contact customer to confirm booking

Quick Summary

GitHub: Where your files are stored and edited

- Edit files by clicking the pencil icon
- Commit your changes to save them
- Changes appear on your website within 1-5 minutes

Formspree: Where booking submissions are sent

- Customers fill out the booking form on your website
- Formspree receives the data and emails it to you
- You can view all submissions in the Formspree dashboard
